EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 10, 19, 28, and 32, the prior art of record does not disclose or suggest a method and apparatus for speech signal conversion, where a voicing signal is used in addition to pitch, formants, and gain, to synthesize a converted speech signal with voice fonts. It is known in the prior art to apply voice fonts to change a synthesized voice to that of another speaker by modifying pitch, but it is not disclosed or reasonably suggested to synthesize voice with a voicing signal, pitch, formants, and gain for voice fonts. None of the references cited in the PCT International Search Report at least discloses formants.

Regarding independent claims 9, 18, 27, 29, 30, 33, and 34, the prior art of record does not disclose or suggest a method and apparatus for speech signal conversion, where linear predictive coding yields a formants output and a residual signal, in addition to a voicing signal, pitch, formants, and gain, to synthesize a converted speech signal with voice fonts. It is known in the prior art to apply voice fonts to change a synthesized voice to that of another speaker by modifying pitch, but it is not disclosed or reasonably suggested to synthesize voice with linear predictive coding, a residual signal, a voicing signal, pitch, formants, and gain for voice fonts. None of the references cited in the PCT International Search Report at least discloses formants.
